Portfolio requirements for Non-BSN RN applicants to graduate programs.

Directions: Each applicant should supply evidence to support achievement of the AACN Baccalaureate Essentials through a portfolio containing your resume and supplementary documentation in the form of transcripts of formal courses completed, continuing education certificates, job descriptions or performance evaluations, professional certifications, narrative explanation or other relevant documents. Documents should be organized by Essential with a brief list or narrative of how the Essential was met. Every competency does not need to be demonstrated but rather the overall achievement of the Essential should be evident in the materials submitted.

Examples of evidence are in the table below.

Process: Applicant creates the portfolio with evidence as a pdf file, and submits to Student Services in the College of Nursing (GradNurse@kent.edu). The Associate Dean of Graduate Programs completes an initial review, then forwards to the Assistant Dean of Undergraduate Programs for evaluation and recommendations which are forwarded back to the Associate Dean of Graduate Programs and Student Support Services who notify the student of the final recommendation.

Portfolio Reviewer Directions: For each Essential circle or highlight the Evidence Example, or add the example and make any needed comments in the space provided under that column. A final statement of the applicant’s attainment of the Essentials must be made with any gaps identified and suggestions for the applicant on how to meet them.

### III Scholarship for Evidence Based Practice
1. Explain the interrelationships among theory, practice, and research.
2. Demonstrate an understanding of the basic elements of the research process and models for applying evidence to clinical practice.
3. Advocate for the protection of human subjects in the conduct of research.
4. Evaluate the credibility of sources of information, including but not limited to databases and Internet resources.
5. Participate in the process of retrieval, appraisal, and synthesis of evidence in collaboration with other members of the healthcare team to improve patient outcomes.
6. Integrate evidence, clinical judgment, inter-professional perspectives, and patient preferences in planning, implementing, and evaluating outcomes of care.
7. Collaborate in the collection, documentation, and dissemination of evidence.
8. Acquire an understanding of the process for how nursing and related healthcare quality and safety measures are developed, validated, and endorsed.
9. Describe mechanisms to resolve identified practice discrepancies between identified standards and practice that may adversely impact patient outcomes.

### IV Information Management and Application of Patient Care Technology
1. Demonstrate skills in using patient care technologies, information systems, and communication devices that support safe nursing practice.
2. Use telecommunication technologies to assist in effective communication in a variety of healthcare settings.
3. Apply safeguards and decision making support tools embedded in patient care technologies and information systems to support a safe practice environment for both patients and healthcare workers.
### Portfolio requirements for Non-BSN RN applicants to graduate programs.

<tr>
<th>Essential and Competencies</th>
<th>Evidence Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>4. Understand the use of CIS systems to document interventions related to achieving nurse sensitive outcomes.</td>
<td></td>
</tr>
<tr>
<td>5. Use standardized terminology in a care environment that reflects nursing’s unique contribution to patient outcomes.</td>
<td></td>
</tr>
<tr>
<td>6. Evaluate data from all relevant sources, including technology, to inform the delivery of care.</td>
<td></td>
</tr>
<tr>
<td>7. Recognize the role of information technology in improving patient care outcomes and creating a safe care environment.</td>
<td></td>
</tr>
<tr>
<td>8. Uphold ethical standards related to data security, regulatory requirements, confidentiality, and clients’ right to privacy.</td>
<td></td>
</tr>
<tr>
<td>9. Apply patient care technologies as appropriate to address the needs of a diverse patient population.</td>
<td></td>
</tr>
<tr>
<td>10. Advocate for the use of new patient care technologies for safe, quality care.</td>
<td></td>
</tr>
<tr>
<td>11. Recognize that redesign of workflow and care processes should precede implementation of care technology to facilitate nursing practice.</td>
<td></td>
</tr>
<tr>
<td>12. Participate in evaluation of information in practice settings through policy and procedure development.</td>
<td></td>
</tr>
</tbody>
</table>

### V Healthcare Policy, Finance, and Regulatory Environments

1. Demonstrate basic knowledge of healthcare policy, finance, and regulatory environments, including local, state, national, and global healthcare trends.
2. Describe how health care is organized and financed, including the implications of business principles, such as patient and system cost factors.
3. Compare the benefits and limitations of the major forms of reimbursement on the delivery of health care services.
4. Examine legislative and regulatory processes relevant to the provision of health care.
5. Describe state and national statutes, rules, and regulations that authorize and define professional nursing practice.
6. Explore the impact of sociocultural, economic, legal, and political factors influencing healthcare delivery and practice.

- Participation or leadership in policy changes at any level.
- Served on policy and procedure committee locally, or other patient care policy committees.
- Participated in budgeting or billing activities.
## Portfolio requirements for Non-BSN RN applicants to graduate programs.

<tbody>
<tr>
<td>7. Examine the roles and responsibilities of the regulatory agencies and their effect on patient care quality, workplace safety, and the scope of nursing and other health professionals’ practice.</td>
<td>• Work history in an inter-professional setting.</td>
</tr>
<tr>
<td>8. Discuss the implications of healthcare policy on issues of access, equity, affordability, and social justice in healthcare delivery.</td>
<td>• Team based activities geared toward patient care.</td>
</tr>
<tr>
<td>9. Use an ethical framework to evaluate the impact of social policies on healthcare, especially for vulnerable populations.</td>
<td>• Membership on interdisciplinary committees.</td>
</tr>
<tr>
<td>10. Articulate, through a nursing perspective, issues concerning healthcare delivery to decision makers within healthcare organizations and other policy arenas.</td>
<td></td>
</tr>
<tr>
<td>11. Participate as a nursing professional in political processes and grassroots legislative efforts to influence healthcare policy.</td>
<td></td>
</tr>
<tr>
<td>12. Advocate for consumers and the nursing profession.</td>
<td></td>
</tr>
</tbody>
</table>

### VI Inter-professional Communication and Collaboration for Improving Patient Health Outcomes

1. Compare/contrast the roles and perspectives of the nursing profession with other care professionals on the healthcare team (i.e., scope of discipline, education and licensure requirements).
2. Use inter and intra-professional communication and collaborative skills to deliver evidence based, patient-centered care.
3. Incorporate effective communication techniques, including negotiation and conflict resolution to produce positive professional working relationships.
4. Contribute the unique nursing perspective to inter-professional teams to optimize patient outcomes.
5. Demonstrate appropriate teambuilding and collaborative strategies when working with inter-professional teams.
6. Advocate for high quality and safe patient care as a member of the Inter-professional team.

### VII Clinical Prevention and Population Health

1. Assess protective and predictive factors, including genetics, which influence the health of individuals, families, groups, communities, and populations.

### Work history in a inter-professional setting.

- Participation in population based initiatives such as fall prevention programs, health fair screenings, cancer prevention and screening, etc.
## Portfolio requirements for Non-BSN RN applicants to graduate programs.
