## HOW ZIKA SPREADS

### Most people get Zika from a mosquito bite

### Other ways people get Zika

**During pregnancy**  
A pregnant woman can pass Zika virus to her fetus during pregnancy. Zika infection during pregnancy can cause serious birth defects and is associated with other pregnancy problems.

**Through sex**  
Zika virus can be passed through sex from a person who has Zika to his or her sex partners.

**Through blood transfusion**  
Zika virus may be spread through blood transfusion.
